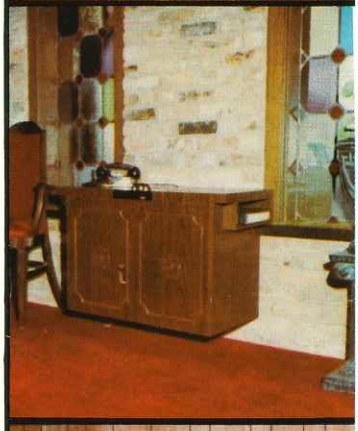
D13/22 IL

THE COMPLETE LINE FOR ANY TELEPHONE FACILITY



In the world of telephone booths, Marketing Sales has taken the lead in offering the widest variety of enclosures and directory accessories. We seek this lead seriously as we believe telephone service is too vital a public function to be tucked in some out of the way place. It is our belief that this service can be made to enhance any premise while at the same time inviting public use.

Quality

We strive constantly to provide the best constructed products available at a reasonable cost. We stand behind each product and guarantee our materials and workmanship. Telephone booths and directory racks are all we make and through our predecessors, have been manufacturing telephone booths since 1929. This experience and specialized knowledge stands behind every product we make.

Design Service

Our experienced staff is available to meet any requirements that you may have. These complete services include designing, cost estimates, manufacturing in almost any material, co-ordination with the local telephone companies and if necessary, on the job installation.

Representatives

At present, there are nearly fifty distributors across the country who represent us. If you are not acquainted with our distributor in your area, write or call collect our home office and we will arrange to have him contact you promptly.

TELEPHONE BOOTHS

TO HARMONIZE WITH ANY MOTIF

THE MODERN MC-101

A complete new offering, this booth meets the trends of today, in both appearance and construction. Oversize, by yesterday's standards, it is finished in long wearing laminate and entirely trimmed in stainless steel with stainless steel doors. This booth comes equipped with lighting, signing, automatic fan, seat, shelf, and coin telephone mounting plate. Solid color finishes offered are beige, green, dark brown, blue and red.

Height: 84″ Width: 32″ Depth 30½″

THE COLONIAL MC-102

Light and inviting, this booth is made to be placed where people will see and use it. The Booth is constructed of White Tidewood laminate, complete with wood overhang and pillars which are finished in white with gold trim and brass pulls. Each unit is equipped with lighting, signing, automatic fan, seat, shelf, and coin telephone mounting plate.

Height: 92″ Width: 32½″ Depth: 31½″

EARLY AMERICAN MC-103

For advocates of Early American decor, we now stock a telephone booth that is designed for this decor even to the bottle glass doors. Constructed of Burnt Maple laminate with stained wood trim, this booth comes fully equipped with automatic fan, lighting, signing, seat, shelf and coin telephone mounting plate.

Height: 93″ Width: 34″ Depth: 31½″

THE FEDERAL MC-104

A formal and stately telephone booth to match a corresponding decor, this unit is finished in a rich Rosewood laminate on both the exterior and interior and is appointed in gold and brass. The doors are paneled with simulated clear diamond glass to give that extra refinement. Each unit comes completely equipped with lighting, signing, automatic fan, seat, shelf, coin telephone mounting plate.

Height: 86″ Width: 32″ Depth: 30½″

THE WESTERN MC-105

The Western with its authentic two way swinging doors and barnwood laminate finish realistically fits the "swinging door" era. The unit comes equipped with lighting, signing, automatic fan, coin telephone mounting plate, seat, shelf, and of course, the authentic pair of steer horns.

Height: 84″ Width: 32″ Depth: 31½″

THE TRADITIONAL MC-110

There is no imitation that quite measures up to the rich grain and texture of real wood. Our traditional line is a wood booth of furniture quality. Standard is light oak unfinished with a baked enameled steel interior painted light brown. Writing shelf and lighting are included. Seat, lighted signing and automatic door operated ventilating fan are optional. Clear lacquer finish can be specified. Other stock woods available are: light birch, mahogany, cherry, maple, red oak, and walnut.

Height: 84″ Width: 29″ Depth: 30″

THE CHURCHHILL MC-120

MC-120A—Golden Oak Finish
MC-120B—Medium Mahogany Finish

This booth has been a standby for the telephone industry having been in continuous demand longer than any other telephone booth now in use. Available in two attractive exterior finishes, the interior is winter green enameled 24 gage steel. No flooring is built into this unit, but a writing shelf and lighting are standard equipment. A seat and automatic fan are available if desired.

Height: 84″ Width: 29″ Depth: 30″

THE ATLAS MC-130

An all steel booth designed to offer a combination of long life and good acoustics. Upper interior is perforated over a sound proof liner. Standard equipment includes, automatic door operated light, writing shelf and instrument mounting plate. Optional items available are seat, fan and decal "Telephone" sign.

MC-130A This is a 20 gage cold rolled steel unit offered in our selection of baked enamel finishes.

MC-130B A semi-stainless steel unit. If recessed, it would show all stainless steel. Back and two sides are done in any of our baked enamel finishes.

MC-130C Completely constructed of stainless steel.

Height: 84″ Width: 30″ Depth: 30″

All the above units may be multiplied and or recessed into any arrangement needed. For these groupings, we have matching trim and separators.
For additional information on recessed installations see page 8 of this catalog.
All units are equipped for regular coin telephone instrument mountings. If house phones or panel coin instruments are to be used, this should be specified.

TELEPHONE SHELVES

CO-ORDINATED WITH BOOTHS — MATCHING INDIVIDUAL DECOR

MARKETING SALES COMPANY

THE MARKETEER MZ-600

This shelf has been designed and engineered to be the most complete unit on the market today. Constructed of polished stainless steel, with clear acrylic sides, each unit comes equipped with perforated stainless steel backboard, lighted sign, instrument lighting and one self-storing directory binder. Additional binders up to four may be ordered and attached to each shelf. Binders are available in ½″, 1″, and 3½″ sizes.

Height: 34½″ Width: 25½″ Depth: 14½″

A similar shelf, designed for the Western Electric Panel Coin Telephone can be ordered as the MZ-660.

THE COLONIAL MP-701

Our Colonial Model expresses the tradition of gracious living often found in the South. An oversize shelf, this unit is constructed of white high pressure laminate and each side is paneled with a rich red flocked vinyl covering. Equipped complete with lighting, signing, and directory shelf, these units can be multiplied or ordered for panel coin instruments.

Height: 46½″ Width: 25½″ Depth: 17″

THE EARLY AMERICAN MP-702

For a shelf unit to fit any Early American decor, we offer our MC-702. Combining hardwood spindles with long wearing laminate, each side is trimmed with a rich green flocked vinyl panel. Available in single or multiple units, for standard of panel telephones, each unit comes completely assembled and equipped with lighting, signing and directory shelf.

Specifications:

Height: 46½″ Width: 25½″ Depth: 17″

GAY NINETY'S MP-790

This unit with the charm of yesteryear comes standard as a wall mounted shelf. The laminate stand shown can be provided as an optional item. To meet your particular specifications, any laminates besides our standards can be used as well as a selection of gold, green or red for the flocked vinyl panels. Available in singles or multiples, these units can be had for panel coin telephones or standard coin instruments.

Height: 46½″ Width: 25½″ Depth: 17″

THE FEDERAL MP-705

A companion unit to our full booth #MC-104, this shelf is constructed of Rosewood laminate. Trimmed in gold with raised gold signing, this unit comes assembled with lighting and directory shelf. Available in single or multiple units, it may be specified for the panel coin telephone.

Height: 36″ Width: 22⅝″ Depth: 16″

THE OLD ENGLISH MP-707

A combination of natural finished wood, real cedar shingles and simulated bottle-glass side panels, this unit definitely fits into an old world atmosphere. Equipped with signing, lighting, and directory shelf, this unit can be made into multiples, however, it cannot be provided for the panel coin telephone.

Height: 42″ Width: 22⅝″ Depth: 16″

THE RANCHERO MP-709

This enclosure can be Western, Rustic or just Early American Barn. Constructed of laminated plastic with a real wood shingle barn roof, this unit comes assembled and with lighting, signing and directory shelf. Available in our five stock laminate colors, "shown on page 4", this unit can be made up in any color arrangement as we show in the accompanying photograph. Also available for the panel coin telephone.

Height: 48″ Width: 24″ Depth: 18″

SLIM LINE MP-711

Only 10½ inches in depth, from the wall, this unit not only offers a slim appearance but fits a definite need where space is a problem. With built in signing, lighting and directory shelf, this unit is available in multiples and for the panel coin phones.

Five stock laminate colors standard, any color pattern available on special order.

Height: 36″ Width: 22⅝″ Depth: 10½″

The above units noted can be multiplied into any arrangement. Matching stands and legs are available on special order. If the back side would be exposed specify this finished.

ENCLOSURES

A VARIETY OF STYLES AND USES

THE WATCHMAN MC-190

Designed for privacy and good acoustics. Interior including ceiling is anodized perforated aluminum over acoustical glass fiber. Light and telephone shelf are included. Standard is unfinished light oak. We also offer white birch, mahogany, cherry, maple, walnut, and red oak. Clear lacquer finishes can be specified.

MC-190A. This is the same booth as above, except made of 20 gage cold rolled steel with a baked enamel finish. Stock colors are beige, dark brown, blue, green, and gray.

MC-190B. The same design as above, except made entirely of stainless steel.

Height: 79½″ Width: 30″ Depth: 38″

KIDDIE BOOTH MP-714

Kiddie-lands can be found in some of the strangest places and for this reason, we offer a unit with hand painted characters. Constructed of ¾″ particleboard and finished in white laminate, this unit comes assembled and equipped with signing, lighting and directory shelf. Available in multiples and for the panel coin telephone, we can also provide miniature sizes for childrens use on special order.

Height: 60″ Width: 24″ Depth: 16″

CONSOLETTE MP-720

Probably the most unique piece of furniture offered as a coin telephone enclosure, the Consolette can serve you in the most discriminating club, lobby or restaurant. Containing an out of sight conventional paystation instrument, with only the coin chute, coin return button and coin return slot exposed. This unit allows for the coordination of any style desk telephone. For security, this unit is mounted to the wall and off the floor. Stock design as shown, other combinations are available in a knee-hole desk, Early American and Oriental.

Height: 24″ Width: 36″ Depth: 16″

THE BARREL MP-708

One of our more popular novelty enclosures, this unit is actually constructed from a real white oak wood barrel. Sturdy for rugged use, this unit is shipped assembled and is equipped with lighting, signing, and directory shelf. This unit can also be made for the panel coin telephone.

Height: 35″ Width: 27″ Depth: 22″

EMTEECO OUTDOOR BOOTHS MT-607

Modern in design . . . inviting in color . . . and constructed to give 20 years or more of satisfactory service, these painted galvanized steel booths come fully equipped with signing, lighting, concealed wiring, injury-free self-closing door, utility shelf, completely assembled and ready for easy installation. Available in any color of your choice, we will gladly match to any color sample you send us.

MT-607-S. This is the same design as above, only constructed entirely out of stainless steel.

Height: 82″ Width: 33½″ Depth: 33½″

RECESSED SHELF MP-715

Sometimes it is just necessary that the enclosures be recessed into the wall. Most of our designs are adaptable to this placement, but the MP-715 is actually designed for it. Multiple units are particularly attractive. Same design is available for the panel coin telephone.

Equipped as shown, these laminated units are stocked in the five standard colors. Other colors and patterns available. A one inch (1″) rough opening should be allowed over the following measurements.

	Width	Height	Depth
List 1	22⅝″	36″	16″
List 2	44½″	36″	16″
List 3	65½″	36″	16″
List 4	89¼″	36″	16″

THE STARLIGHT MC-119

The starlight enclosure is a blend of modern decor and acoustical efficiency for either wall mounted or recessed installations. With anodized perforated interior over a sound absorbing liner, this unit comes standard in an unfinished birch trim. Directory shelf is optional and special wood trims are available.

This same unit may be ordered in stainless steel clad with stainless steel perforated interior as shown.

Height: 30½″ (with directory shelf 37″) Width: 27″ Depth: 13″

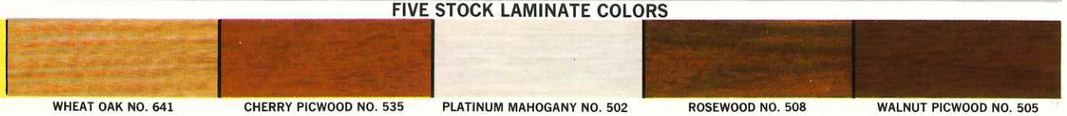
THE HOLMES MC-220

A continuing popular design, this shelf lends itself well to most installations and is particularly neat in multiple arrangements.

Available in any of our stock laminate finishes, the interior is perforated anodized aluminum over a sound absorbing liner. Trim is matching aluminum. Directory shelf is optional.

Height: 30″ (with directory shelf 34″) Width: 24″ Depth: 16″

FIVE STOCK LAMINATE COLORS



WHEAT OAK NO. 641 | CHERRY PICWOOD NO. 535 | PLATINUM MAHOGANY NO. 502 | ROSEWOOD NO. 508 | WALNUT PICWOOD NO. 505

ACOUSTIC ENCLOSURES

FOR PUBLIC AND PRIVATE USE

MARKETING SALES COMPANY

CORNER SHELF MP-750

Sometimes only corners are available and our Corner Shelf is made specifically to take full advantage of corners. Constructed of laminate plastic, this unit comes equipped with signing, lighting, and directory shelf. Available also for the W. E. panel coin telephone, this shelf is stocked in our five stock colors and can be ordered in any color or pattern.

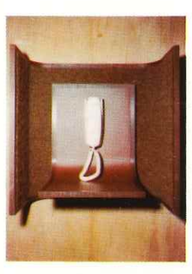
Height: 36″ Width: 25½″ Depth: 15″

THE FISHER—AN EXECUTIVE SHELF MC-150

The leading shelf in our executive line, of proven designs that offers customer comfort, good acoustics with the rich finish of wood exterior. The interior is done in anodized perforated aluminum over a sound absorbing liner. Standard is unfinished White Birch without directory shelf. Clear lacquer finish may be specified, as well as a directory shelf. Other woods available are Mahogany, Cherry, Maple, Light Oak, Red Oak, and Walnut. This unit is available in multiples.

On special orders, this unit can be had in stainless steel clad.

Height: 26″ Width: 27½″ Depth: 26″

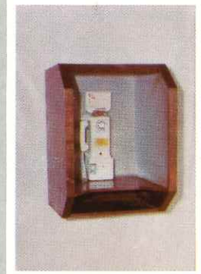


THE HOUSE-PHONE SHELF MP-765

This shelf is designed and proportioned for a regular wall instrument as used in a hotel or motel house-phone installation. Plastic laminate exterior, we use a rich textured carpeting on the interior which is itself a good acoustical material. For special installations, if the customer wishes to furnish the carpeting, this unit can be finished in the same material as used on the premise.

Available in multiples, this unit is not recommended as shown for coin installations.

Height: 24″ Width: 22⅝″ Depth: 16″



THE YORK—AN EXECUTIVE SHELF MC-160

This popular model of bright anodized, perforated aluminum interior with trim and exterior in natural wood, is designed to offer a maximum of custom comfort with good looks. The model is constructed of an attractive white unfinished birch. Available in multiples with or without directory shelves, this unit may also be had in a variety of hard woods.

For special orders, we will clad this unit in high polish stainless steel with perforated stainless steel interior.

Height: 35½″ Width: 26″ Depth: 24″

THE HUFF—AN EXECUTIVE SHELF MC-180

Designed to recess or mount to the wall and afford maximum amount of custom comfort and acoustics. Stock unit is unfinished white birch with an anodized perforated aluminum interior over a sound absorbing liner. Directory shelf and interior lighting are optional. This design lends itself well to multiple arrangements.

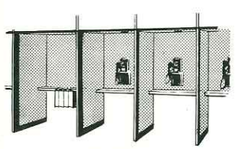
This unit is available in steel or stainless steel clad. In steel we have a selection of six baked enamel finishes.

Height 30″ Width: 24″ Depth: 17¼″

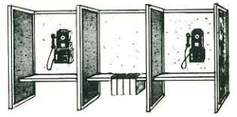
THE SHOP SHELF MC-112

This is a man size shelf designed for noisy shop locations. Constructed of heavy gauge steel for rugged use, this this unit has 2″ thick walls for high acoustical efficiency. Finished in a double coat gray baked enamel, this unit will withstand rough handling and corrosive atmosphere. Low in cost, this unit can help prevent costly mistakes on those detailed shop conversations.

Height: 30″ Width: 28″ Depth: 23″ at top; 15″ at writing shelf.



MC-100 PANEL BOOTHS



MC-200 PANEL BOOTH

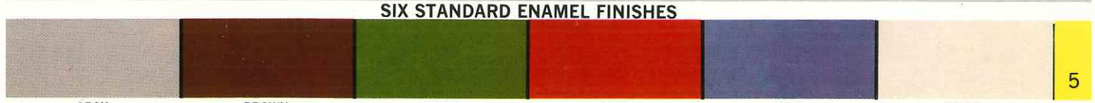
MODULAR PANEL BOOTHS

The MC-100 and MC-200 series are a customized modular arrangement of telephone and directory facility openings that provide a beautiful, but functional answer to public telephone centers. Both can be made up into as many openings as needed. Made of stainless steel construction, the panels are edged in solid walnut or other wood of your choice.

The MC-100 series is usually recessed with five foot side panels that are installed so the bottom of the panel is above floor level for rapid cleaning services. Each opening is 28″ wide and shelf height is between 42″ — 45″ from floor. Directory and telephone mounting will be arranged to your requirements.

The MC-200 series is made to be attached to a wall. Four foot stainless steel side panels are also trimmed in a solid wood of your choice. Each opening is 28″ wide and 20″ deep. We customize each arrangement to the number of openings, directory facilities and telephone mountings needed.

SIX STANDARD ENAMEL FINISHES



GRAY | BROWN | GREEN | RED | BLUE | BEIGE

DIRECTORY FACILITIES
CONSOLES AND TABLE MODELS

DIRECTORY CONSOLE MP-760

The newest in Directory Consoles offers up-to-date long distance information service right at a fingertip. Hundreds of information centers can be preset with the use of a Magicall unit and by inccrporating one or more of these units into our Directory Console, a person only has to turn the knob to the city of his choice and lift up the handset for contact with the information operators. Fast and convenient, this type of console eliminates the costly maintenance of keeping a foreign directory library in place.
Our MP-760 is designed to be a free standing 3′ x 8′ island arrangement, incorporating two Magicall units at each end. The cabinet with two locked access panels is finished in a choice of laminate. All trim, legs and hardware are stainless steel as well as the frame for the 4′ x 4′ double face lighted sign. Other arrangements can be made to your specifications.

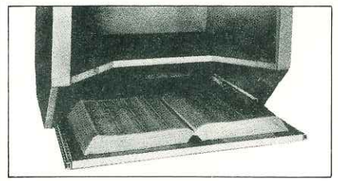
THE HEATH MC-270

Our newest directory stand combines modern design with a practical and proven directory binder. Stands are customized into any arrangement of 2 inch and 3 inch binders needed and can be grouped as desired or as shown. Minimum stand (32″) consists of 3 - 2″ binders and additional binders can be added to any length. See binders, page 7, for sizing requirements. Constructed of high pressure laminate for long life, this stand can be ordered either as a wall mounted unit or floor standing unit. Directory binders are stainless steel and can hold more than one directory. Signing and lighting is optional.

Depth: 19⅞″ Height: without legs 21¼″ — with legs 45¼″

THE STANDARD MC-210

This sturdy, attractive table mounted directory rack has been an industry standard for years. Enameled steel underbody, with adjustable glide feet, the top and directory binders are of high polish stainless steel. As with our other directory racks, these units are customized to the number and size of binders needed. See page 7 for sizing requirements. Depth is 15″ and book level or height is 40″.

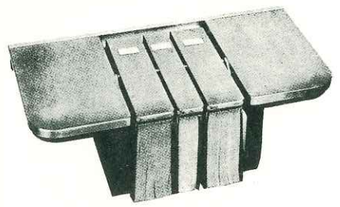


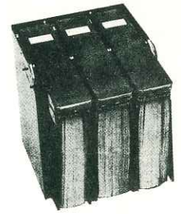
SLIDING DIRECTORY SHELVES

Sliding directory shelves are a unique and practical way of providing for large metropolitan directories. This arrangement is only available on our MC-150, MC-160 and MC-180 shelves.
Directory chains of a nylon covered wire, 14″ long are available for any of our units and can be factory installed.

DIRECTORY SHELVES — BINDERS
SPECIAL APPLICATION ENCLOSURES

MARKETING
SALES COMPANY





DIRECTORY RACK MC-225

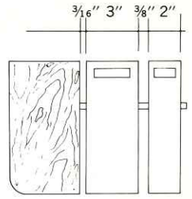
This easy to mount stainless steel top directory rack can fit to any wall or a telephone booth itself. Customized to your binder requirements (see binders below) this unit is 13⅝″ in depth and takes 12″ in height.

DIRECTORY RACK INSERT MC-250

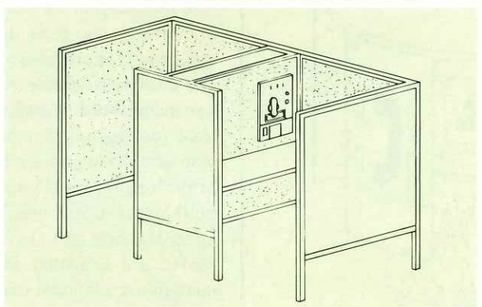
Our directory rack insert as with our other directory tables is made to your requirements. Just indicate the size and number of binders you need and we will supply the complete insert with mounting hardware. The container is gray enameled steel. A stainless steel container is also available. All hardware and binder are finished in stainless steel. Size of unit is 13⅝″ deep and 12″ high.

DIRECTORY BINDERS

Our directory binders are all stainless steel with a recess window built into each for directory identification. Steel slats hold directories in place and depending on the size, more than one directory can be held in each binder. Binders come in 2 inch and 3 inch widths. Three binders are principally made to swing on a pivot rod as fashioned into our consoles and directory racks.

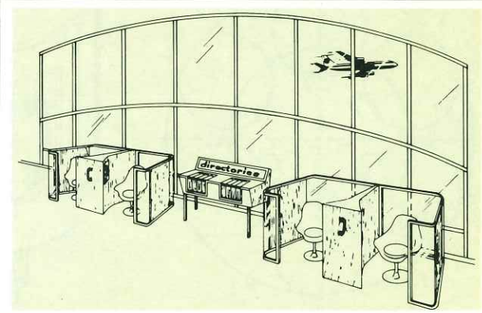


We multiply these binders into any of our directory tables or racks to meet your requirements. Any combination of 2 inch or 3 inch binders may be used. For spacing allow ⅜″ clearance between binders and 3/16″ end clearance at shelf. To specify just add quantity and size at binders required to model description. For example: MC-270 Heath #508 with legs with two groups of 2 - 2″ and 3 - 3″ binders.



CARREL BOOTH MC-1000

Carrel Telephone Booths are frequently installed in airports, bus or other public buildings where special treatment is desired. Usually customized to the decor, we offer a wide range of wall panel materials, from colorful plastic laminates to full stainless steel. We recommend that interiors be acoustically treated with a perforated material over a fiberglass sound absorbing liner. Key slotted parts form the framework and all units are furnished to fit any type of instrument, with writing shelf and fiberglass seat. Our designers will work with you to meet your most exacting requirements.

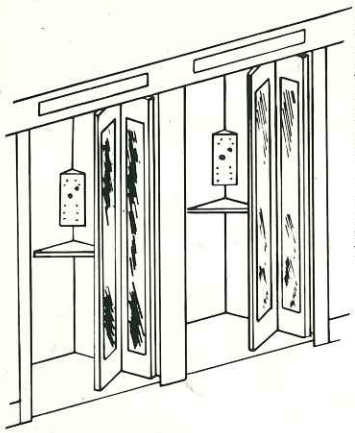


LOW PROFILE M-6002

Our newest design in customized telephone enclosures. With the accent on spaciousness, we have built in as much glass area as is practical. Either tempered glass or clear acrylic can be used and it is trimmed in stainless steel. Side panels of either a dark wood grain or color plastic laminate are available. Shelf and fiberglass chair included.

SPECIAL RECESSED ENCLOSURES

FROM FULL BOOTHS TO DOORS AND FRAMES — TO SUIT YOUR NEEDS



RECESSED GROUPS

SPECIAL RECESSED ENCLOSURES

Nearly all of our designs are available for recessed and multiple groupings. For full booths, matching trim and separators for recessing flush into walls and soffits, are available, and need only be specified.

Details of any installation arrangement will be made available on request to our Design-Engineering Department at the home office.

BOOTH DOORS & FRAME MC-127

To fit in existing alcoves or small telephone rooms, we can provide the doors and frames. This includes top lintel, frame, 2 clear glass panels and roller guide door track assembly. Shipped hinged and assembled, we offer these in wood, steel and stainless steel. Standard in wood is unfinished light oak. Clear lacquer finish and other woods available. Steel doors, and frames come in any of our six baked enameled finishes. Stainless steel is in 20 gage. Optional items that may be added are: automatic light and fan switch linkage, lighted or decal telephone sign, matching seat, writing shelf, and telephone mounting plate. Standard sizes on frame & door:

Wood — 29″ wide x 84″ high
Steel — 30″ wide x 84″ high
